

INNOKREA

Stabilizing Complex Ticketing Systems

Architecture • Integration

- Implementation Support for Public Transport Systems

Experience in Complex IT Environments

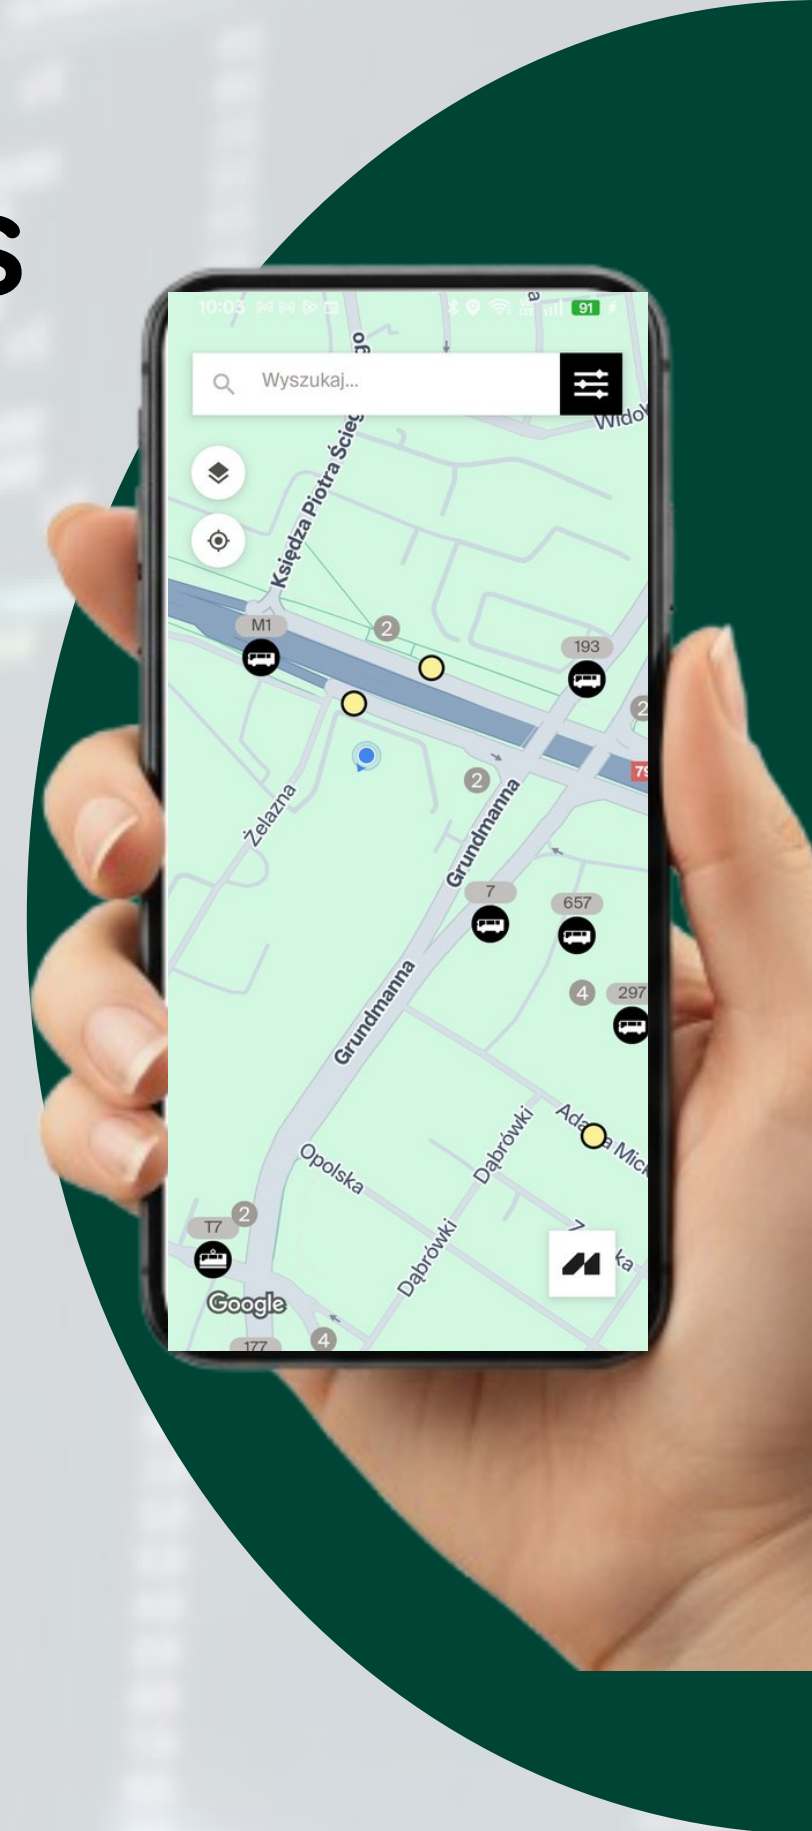

- 100+ software projects delivered
- working with large-scale system integrations
- projects involving hardware + software ecosystems
- expertise in **mobility and ticketing-related solutions**
- long-term R&D cooperation with universities

How We Support Ticketing Vendors and Public Transport IT Teams

Architecture Support

- architecture validation
- integration strategy
- legacy system integration

Specialized Development

- mobile ticketing
- backend services
- system integrations

Implementation Support

- stabilizing complex deployments
- coordinating integrations between vendors
- reducing operational risk

Independent Implementation Partner

We support:

- ticketing vendors
- system integrators
- transport operators

Typical roles:

- architecture advisor
- integration lead
- technical implementation partner

Especially in projects where:

- multiple vendors are involved
- integration complexity is high
- internal teams are overloaded

**We help stabilize
complex deployments.**

When Ticketing Projects Become Difficult

Typically when:

- ✓ integration complexity increases
- ✓ requirements change mid-project
- ✓ multiple vendors are involved
- ✓ internal teams are overloaded

This is where external implementation support becomes most valuable.

Where We Typically Help

Projects where:

- legacy systems cannot be replaced
- multiple vendors are involved
- integration complexity is high
- internal teams are overloaded
- regulations change during implementation

Value Proposition:

Bringing structure and technical clarity to complex environments

INNOKREA Talk to Us When:

You are working on:

- ticketing platforms
- multimodal mobility systems
- complex system integrations

Your project involves:

- legacy infrastructure
- multiple vendors
- tight delivery timelines

We help stabilize complex implementations.

Solid Delivery Partner for **Public Transport Software**
